

3

MiniWorld *the full model*

this repository

MiniPairformer MiniMSAModule staged training inference evaluation
BioMol DataCooker training databases

owns the assembled network, its data, and the reduced blocks only it needs

import team_gm

2

team-gm *shared framework hub*

git submodule

Pairformer MSA module template stack diffusion transformer SWA atom stack
diffusers training loop callbacks ImplementationType

owns how ops are composed into blocks — the reference AlphaFold 3 stack

import miniworld_engine

1

miniworld-engine *fused kernels and ops*

git-pinned dependency

triangle multiplication triangle attention transition outer product mean
attention pair bias adaptive LayerNorm SWA 3D-RoPE attention MP primitives

owns backend dispatch per shape and architecture, the autotune cache, and the fused residual
